

Light Vehicle Trailer Management

The AutoSense trailer management training is for drivers new to the task, or requiring a refresher of the skills and technical reinforcement of the process encompassing the dynamics of handling a trailer.

It is a 45 minute hands on session (one on one) working with a qualified driving Instructor, covering the latest knowledge and skills necessary for safe and competent trailer management in all driving environments.

A 15-point plan is followed to ensure each step is considered in the appropriate order/stage of the process of reversing, until the driver demonstrates understanding, confidence and competence in all 5 manoeuvre types. Load management will also be covered.

- Straight line reverse, 30 meters
- Reverse in to parking bay, nearside
- Reverse into parking bay, offside
- Reverse into and out of confined entranceways
- Reverse a curved driveway

What's involved

- A total of 3 hours with a qualified driving instructor.
- Participants take part in 45 minute intervals.
- Minimum 4 people per course.
- A company vehicle and trailer is required for the training.

What will you get out of the programme?

- Fully tutored guidance and practice.
- A certificate of completion for each driver.
- Understanding of the reversing dynamic, loading and H&S requirements.
- Confidence and skill to handle reversing tasks.
- Less down time on the job, given the up to date knowledge, increased skill awareness and experience.
