

# Driving Safety

Information, insights and resources  
to help improve fleet and driver safety

This month we're sharing new insights into driver fatigue and distraction with the release of the **New Zealand Guardian Insights Report**, alongside the launch of **Guardian Generation 3**. We're also spotlighting **NZ Fleet Forum 2026** – bringing industry leaders, fleet managers, and safety professionals together to focus on driver mental health, wellbeing, and safety. Seats are filling fast, so bring your team and secure your places.

## Why the School Run Is New Zealand's Most Dangerous Driving Time

The school run may feel routine, but new AutoSense insights show it's one of the **highest-risk driving periods** on New Zealand roads. Morning traffic peaks at the same time as driver fatigue and distraction, increasing risk for parents, school buses and surrounding communities.

Using **real-world fleet data**, our latest article explains why this everyday journey deserves extra attention – and what can help keep everyone safer.

## and distraction

The inaugural **2024/25 New Zealand Guardian Insights Report** is now available – delivering the most comprehensive view of verified driver fatigue and distraction across New Zealand fleets.

Based exclusively on local data and reviewed 24/7 by human analysts, the findings are clear: **on average, Guardian helped wake 53 drivers a day** last year.

**Download the report** to better understand the risk – and the opportunity to build safer driving habits, smarter systems, and stronger safety cultures.

## Guardian Gen 3 has arrived - advanced detection with real-time support

**Guardian Generation 3 by Seeing Machines** is now available, delivering enhanced, scientifically validated drowsiness detection and highly precise eye-gaze tracking to identify fatigue, distraction, and inattention as they happen. Events are verified 24/7 by the Human Help Centre,

with local NZ support ensuring fast, efficient service when it matters most.
