

Stop mobile distraction before it starts

LifeSaver Mobile is an **app-based solution take control of mobile-phone distraction by managing phone use at a Mobile Device Management (MDM) level**. It's simple to deploy, works seamlessly in the background, and supports safer, more focused driving.

Designed to take control of one of the biggest risks on our roads, LifeSaver Mobile automatically detects when a driver is on the move and blocks unsafe or unauthorised phone use — without the need for additional hardware.

- ✓ **No extra hardware.**
- ✓ **No complicated setup.**
- ✓ **Just safer driving across your entire fleet.**

Why It Matters

LifeSaver Mobile gives you the tools to actively manage distraction risk — helping meet your Health and Safety obligations and protecting your people on the road.

Trusted by Fleets Worldwide

Used by leading fleets across logistics, utilities, and service industries, LifeSaver Mobile is now available in New Zealand and Australia — exclusively through AutoSense.

How It Works

Screen Blanking

Locks or limits apps that cause distraction while driving.

Automatic Drive Detection

Activates as the vehicle moves — no manual input required

Phone Compliance

Manage phone use at an MDM level to enforce hands-free compliance and support safer driving across your fleet.

Voice Alerts

Real-time audio reminders if drivers attempt to use their phone on the road.

Manager Dashboard

Visibility of driver compliance and phone-use trends.

Fast Deployment

Roll out to hundreds of drivers in a single day.
