

Driving Safety

Information, insights and resources
to help improve fleet and driver safety

Thanks for your interest in the work we do at AutoSense! In this edition you'll find:

- **New tech:** Guardian now detects fatigue *before* a micro-sleep.
- **Sleep testing:** Simple, home-based sleep health checks for drivers.
- **Fleet Champions Awards:** Deadline extended to 8 August.
- **4G upgrade reminder:** 3G shuts down end of 2025.

New tech: Guardian sees fatigue coming before you do

Fatigue is the biggest killer on our roads. That's why Guardian by Seeing Machines now includes **Driver Drowsiness Attention Warning (DDAW)** – a game-changing feature that detects early signs of fatigue **before** a micro-sleep occurs. Using real-time data and subtle light bar alerts, drivers can take action sooner, helping prevent serious incidents.

Worried about your drivers' sleep health?

Fatigue is often linked to undiagnosed sleep disorders like sleep apnea.

Our best-in-class home sleep test is simple, overnight, and highly accurate. Results are reviewed by our expert fatigue and sleep health consultant, Kat Aubrey, with personalised treatment plans to support long-term driver health and performance.

Australasian Fleet Champions Awards

EXTENDED DEADLINE: 8 AUGUST 2025 – Don't miss out!

There's still time to enter the Australasian Fleet Champions Awards 2025, recognising excellence in fleet safety and sustainability across New Zealand and Australia. These awards celebrate the organisations, suppliers and individuals making roads safer through smart fleet management, sustainable journeys, and a commitment to safer driving.

Do you have an exceptional *Fleet Driver* to recognise or a great *Sustainable Journeys* story to share? It's simple to enter – whether you're leading change, supporting safer practices, or know someone who is, now's the time to share your story and gain the recognition you deserve. Check out the categories and enter today!

Is your fleet ready for 4G?

New Zealand's 3G networks shut down on 31 March 2026. These networks are being phased out in favour of faster, more reliable 4G and 5G services. If you have a Guardian Generation 1 or Generation 2.0 unit in your fleet which needs

to be updated, then get in touch with our friendly NZ based support team to organise this.

GET IN TOUCH

AutoSense is a leader in fleet and driver safety in New Zealand and Australia, supporting heavy and light vehicle fleets with in-vehicle driver monitoring, fleet driver training, personalised coaching, and fatigue and sleep consultancy. Combining innovative safety solutions with expert services, AutoSense helps businesses reduce risk and improve performance – creating safer journeys for everyone.
