Fleet Driver Training

In-vehicle Evaluation

60 Minute Drive

This evaluation is targeted at drivers who by nature of their daily work routine may be exposed to crash risk. These are drivers who have been identified by an organisation as partially or not competent.

This may be determined by organisational Health & Safety Policy, incident statistics and or information gathered by the company through company procedures, their insurer or online interventions measuring crash risk.

The evaluation takes place in drivers' usual vehicle with a trained instructor over commonly used routes. On completion of the drive, a report is provided on the driver's individual driving style which includes driver behaviour, hazard identification, decision making, general road-craft knowledge and driving skills.

This is not a driving test, it is aimed to assist a driver to increase awareness and reduce the risk of incident in their work driving duties.

What's involved

- 60 minute in vehicle practical session.
- A one on one session with a trained driving instructor to increase awareness.
- Takes place from your work location.
- One person per course with their own personal vehicle.

What will you get out of the programme?

- A risk report and recommendations for further training.
- Coaching during the drive to increase awareness of correct driving practices.
- Assists organisations to meet workplace safety regulations including director's duty of care.
- Engages staff in the vehicle H&S process.
