90 Minute Coaching Drive

This coaching assessment is targeted at drivers who:

- May have been involved in an incident(s) and require a recalibration of their driving style and attitude.
- Drivers who have been assessed as high risk following a 90 minute assessment drive or online risk assessment
- Drivers with new/additional responsibilities to their driving work requirements
- Drivers who self-identify they require a refresher due to a near miss or out of date knowledge

These are drivers who have been identified as high risk by the organisation. This may be determined by organisational Health & Safety Policy, incident statistics and or information gathered by the company through company procedures, their insurer or online interventions measuring crash risk. This 90 minute assessment and coaching drive is undertaken using the drivers usual vehicle.

A full report is provided on all aspects of the drivers style. Skill level, knowledge and behaviour relating to the driving task, focusing on known weaknesses due to organisational incident/crash/ infringements/self-perpetuating attitudes. This is also an excellent intervention for drivers who wish to reduce overall crash risk through latest information, sound decision making, speed choices and knowledge of fatigue probabilities, optimisation of safety margins including journey planning and fuel efficiencies in relation to safety. This is not a driving test, it is aimed to assist a driver to increase awareness and re-align their personal

What's involved

- 90 minute in vehicle practical session.
- A one-on-one session with a trained driving instructor to increase awareness.
- Takes place from your work location.
- One person per course with their own personal vehicle.

What will you get out of the program?

- A risk assessment report and any areas of weakness.
- A report including feedback and on areas of risk and how to reduce them.
- Increased awareness of correct driving practices.
- Assists you to meet workplace safety regulations including director's duty of care.
- Engages staff in the vehicle H&S process.
