

Online Induction Modules

AutoSense creates customised online induction modules for businesses, making it quick and effective to train staff new to a business, keep records up to date and keep staff engaged.

The AutoSense induction package will:

- Provide a simple, fast and effective means to have all staff go through induction.
- Provide a solution that maintains clear reportable records of completed induction.
- Simplify the induction process by focusing on key points.

Stage One

Induction programme for General and All Company

We work with you to create an induction package that fits your business needs.

A standard package would include:

1. Welcome – CEO's message and organisation commitment to safety
2. Health and Safety policy
3. House Rules
4. Top 10 hazards in transport
5. General overview of hazards, accidents, near misses and reporting

Benefits

- Streamline your clunky training and induction processes.
- All records of learning in one place.
- Simple reporting of completion and compliance levels.
- Simple and easy to implement a solution
- Take the hassle out of induction and training in your organisation.
