

FLEET DRIVER TRAINING

Is driving
your biggest
workplace
risk?

Tailored solutions. Managed service.

The Fleet Driver training programme is a simple three step health and safety based driver training programme.

The programme uses a mixed media approach utilising online modules, along with practical evaluation and coaching.

All online learning components can be either hosted by AutoSense or installed on an organisations own Learning Management System.

HOW IT WORKS

Our three-step programme provides you with visibility of your driver's level of:

- 1 Competency
- 2 Attitudes & behaviour
- 3 Personal risk choices

By assessing these areas, the programme targets those drivers who need practical training, making more efficient use of employee's time and limited resources.

STEP 1

EVALUATE

A short questionnaire is undertaken to evaluate fleet risk and driver behaviour.

Fleet Risk Questionnaire (FRQ)

Fleet Managers complete a gap analysis (FRQ) to the FRQ to understand the current risk of the fleet. Telematics, infringement, crash and complaints data can also be added to gain a full picture of risk.

Driver Behaviour Questionnaire (DBQ)

Employees complete the DBQ - a short 10-minute survey, which identifies areas of risk and a driving type profile. The business receives a driver score to allow targeting training to be planned.

DRIVING SAFETY 

STEP 2

MITIGATE

Once the DBQ is complete, a driver profile is recorded. A summary of results, recommendations and a training proposal is presented. Modules to be specified by results of self-assessments, GPS information and clients insurance crash results.

- **Competent** - complete online modules to build and maintain awareness.
- **Partially Competent** - complete online modules and in-vehicle evaluation.
- **Not Competent** - complete an in-vehicle coaching session targeting identified areas of risk.

Driver Awareness Modules

AutoSense produces driver awareness modules implemented across all drivers. Modules cover all major risk factors.

Specialist Skills

If your drivers are needing some support with specialist driving skills, our team can help. We offer driver familiarisation training for fleet vehicles, as well as EV+Hybrid vehicles. We also offer Trailer Towing and 4WD programmes.

STEP 3

REPORTING

Regular reporting is available. It is held in a Learning Management System, so it is secure and easily accessible.

Fleet

Monthly Delivery Plan: Highlights progress and actions that are required for delivery.

Quarterly Fleet Review: Sessions are a review of overall company results to further identify next steps. An executive summary can be used for board presentation.

- **Annual reviews** are to celebrate successes and reassess overall risk (using FRQ) and plan for the coming 12 months.
- LMS results are reported for trainee completion (competence) levels.

Driver

Individual Assessment reports are provided for all practical assessments including further training recommendations (in-vehicle evaluation and completion).

- Certificates of Completion are provided for training courses (EV, HV, 4WD, Trailer, Community groups).
