

MyEROAD Seeing Machines Video Integration is now available for connected vehicles.

Seeing Machines' Guardian safety technology integrates with MyEROAD, to provide operators with a single interface for managing video telematics.

Seeing Machines' Guardian technology is world leading and utilises face and eye tracking algorithms to detect fatigue and distraction, allowing proactive intervention before a risky driving incident occurs.

The integration of this technology will provide operators with a single tool for managing video telematics, where previously there were two separate managing systems.

This makes it easier for fleet managers to prioritise actionable insights from data, as well as developing a greater understanding of the risks associated with their fleet and coach drivers.

Key Features

One platform to access total fleet video and data if generated by a Guardian camera or EROAD hardware

- Guardian video footage and event data is available to view within MyEROAD Replay
- Seamlessly move between vehicles to check video or event triggers, regardless of whether EROAD Clarity Dashcam or Guardian DMS cameras are installed
- Simplified, clean, easy, user experience for all fleet insights
- One platform to allow improved driver coaching and recording utilising video footage
- Integration occurs through API key available from Seeing Machines or distributor and EROAD
- Vehicles fitted with Guardian DMS hardware DO NOT have to be fitted with EROAD hardware to be visible in MyEROAD

Benefits

Get the full picture in one place. Simplified access enables you to:

1. Prioritise insights
2. Coach drivers more effectively through one integrated system
3. Coverage across your entire fleet
4. One system integrating two fit for purpose solutions
