

Driving Safety

Information, insights and resources
to help improve fleet and driver safety

As we head into the change of season, we're seeing **a mix of factors that can increase driver risk** — daylight saving shifts, Easter holiday traffic, and busy workloads. In this month's update, we're sharing a **timely fatigue warning from our sleep specialist**, a reminder about the **new biometric code rules**, a **useful Guardian integration** many customers may not be aware of, and an opportunity to book **Street Smart sessions for young drivers**.

Fatigue warning as Daylight Saving and Easter collide

Fatigue & Sleep Specialist Kat Aubrey has issued a reminder that the combination of daylight saving ending and the Easter period can increase fatigue risk for drivers — especially for transport operators, shift workers, and anyone driving long distances.

Changes to sleep patterns, early starts, late finishes, and heavier traffic can all affect alertness behind the wheel. Now is a good time to **remind drivers about rest, hydration, and planning ahead.**

Biometric code webinar – recording now available

The new **Biometric Processing Privacy Code** has implications for fleets using driver monitoring, cameras, and other in-vehicle technology.

If you missed the recent [Brake](#) webinar, **the recording is now available to watch below.** It covers what the code means in practice, what fleets need to consider, and how to stay compliant while still managing risk.

Understanding the new Biometric Privacy Code and its implications

WATCH RECORDING

Guardian – did you know?

Many customers don't realise that **Guardian integrates directly into the EROAD portal**, allowing you to view driver safety events alongside telematics data in one dashboard.

This makes it easier to:

- Review safety events and trips in one place
- Reduce time switching between systems
- Give managers better visibility across the fleet

If you'd like help setting this up, our team can assist.

Street Smart bookings now open

AutoSense is proud to support the **Street Smart** young driver programme, helping new drivers understand real-world road risks before they learn the hard way.

Sessions are filling quickly, so now is the time to book for schools, community groups, or company family events.

Street Smart covers:

- Speed, distraction and fatigue risks
- Real crash consequences
- Practical tips for safer driving
